[\(https://johnguerra.co/classes/webDevelopment_online_summer_2026/\)](https://johnguerra.co/classes/webDevelopment_online_summer_2026/)

Lectures and Meetings:

- Weekly Recorded Lectures (Asynchronous)
- Weekly Office Hours (Synchronous)

Welcome to your Web Development course!. I'm John Alexis Guerra Gómez (the last two are the last names) and I'm thrilled to be your instructor for this semester.

With your help, we are going to make this course **highly practical** and **interactive**, with the sole purpose of giving you skills to develop modern full stack systems. However, for that to work, you will need to dedicate a significant amount of your time to preparing the class and developing the projects. Depending on your skill level and previous knowledge of the topics, that time can vary greatly. You can ask previous students about their dedication to the class, but use as a reference that **I expect you to schedule at least 15hrs a week for the course**, and if you want to master the technologies it will probably be more than that. However, if you accept this challenge and are willing to dedicate the amount of time, **at the end of this course you should be able to design and implement a real world full stack application**, choosing from the different alternatives available in the market to better fit your project needs.

The course will be project-based, and will morph according to our collective goals. Because of this, we will be adapting my course materials according your interest and performance of the class. **Be prepared for many changes during the semester.** I have extensive experience in the area, and I'm going to put it to your service, but I'm expect to learn as much from you as you do from me.

The course is built on top of my years of experience teaching the topic. For reference, make sure to check the latest versions of my course at NEU:

(https://johnguerra.co/classes/webDevelopment_spring_2020/)

Nevertheless, remember to keep in mind that we will be adapting the course to your interests and our current situation. Please come to class prepared to propose topics and ideas of how do you want the class to be.

The class will be hybrid, the main contents will be delivered in prerecorded videos (asynchronous) while we offer synchronous meetings to answer questions (synchronous). I have wide experience working with online classes after teaching for four years at the online Masters in Data Science at UC Berkeley, so I we can make the best of this.

Programming is a craft that is better learned by doing, and you will need to dedicate enough weekly time in order to master it. Therefore, make sure to watch the pre-recorded videos, attend office hours, ask questions and participate actively in canvas. You must also complete the class readings before each lecture, and complete all the assignments on time.

I'll be handling all the class communication through the class' slack <https://webdev-online-neu.slack.com/>  (https://join.slack.com/t/webdevelopment-qsj7369/shared_invite/zt-3crocg4x-ZkZmxaomFXszCVfLC5IWmg). Use this link to join https://join.slack.com/t/webdev-online-neu/shared_invite/zt-3mrhtklkl-ESIM~OB6UNjUtUMEcrrhig  (https://join.slack.com/t/webdev-online-neu/shared_invite/zt-3mrhtklkl-ESIM~OB6UNjUtUMEcrrhig). **I prefer slack over email or any other medium of communication**, so please have it installed on your devices in a way that you can get notifications of the announcements we make in the class. More info on how to use slack on the **class' home page** https://johnguerra.co/classes/webDevelopment_online_summer_2026/  (https://johnguerra.co/classes/webDevelopment_online_summer_2026/), this page is shared with the in-person version of the class.

All submissions should be sent using this link:

<https://docs.google.com/forms/d/e/1FAIpQLScruVU1St2ngynb-mV2-ws7GTNRUqxni5y8-XtzUKazpOb37Q/viewform>  (<https://docs.google.com/forms/d/e/1FAIpQLScruVU1St2ngynb-mV2-ws7GTNRUqxni5y8-XtzUKazpOb37Q/viewform>)

Teaching is one of my passions, so I'm here to better support you to achieve this goal. If you take my course, be **prepared to work hard** but knowing that I'll be working as hard, next to and for you. If you demonstrate that you have worked hard, I'll do my best to help you improve your skills.

We will be creating a safe space in the classroom where you can express your points of view, and even if I'll be calling the shots, I commit to always listen to you. I'm always looking for new methods to improve my teaching, so any constructive feedback that you might have will always be welcomed.

Looking forward to a wonderful class!

John
